## NY Metro ASHE Honors GEOD with Award for Excellence

### Technology Project of the Year—2010 Survey/Mapping of the MTA's No. 7 Subway Extension

The MTA's No. 7 Subway Extension project will provide critical transit access and spur development in Manhattan's Hudson Yards area. The economic development resulting from the completion of this 1.5 mile extension will generate increased tax revenues as well as numerous new construction and permanent jobs. GEOD was contracted to check survey control established by the contractor to assure that the same was accurate and that the tunnel was progressing in accordance with the design alignment. In addition, GEOD was to map the tunnel ceiling and compare the as-built drawing of the ceiling to the design drawing and see if there was any over-cutting on the ceiling. ***GEOD's Task Analysis determined that the use of Laser Scanning Technology would best satisfy the project needs.*** GEOD proudly entered a display of its work on the MTA's No. 7 Subway Extension Project for NY Metro ASHE Award for Excellence 2010 competition consideration.... ***(read more)***
