

Technology plays a vital role in the continued development of our firm. Using the latest and greatest hardware and software builds efficiencies into our systems that we are able to pass onto our clients in terms of time and money.

Since 1961, GEOD has been known for the quality and accuracy of our mapping, having built our reputation through early adoption of innovative measurement techniques, such as Low Altitude Mapping & Photogrammetry (LAMP) and high definition laser scanning. These techniques provide greater information and accuracy to our clients.

The Benchmark in Quality, Proven Performance and Reliability Since 1961

Land Surveying

Drone Surveys

3D Laser
Scanning

Aerial Photography/
Photogrammetric &
LiDAR Mapping

Subsurface
Utility Markouts

As of October 2021, GEOD Corporation became an affiliated company of MFS Consulting Engineers & Surveyor, DPC (MFS Engineers & Surveyors), a multidiscipline, MBE/DBE/SBE certified civil engineering firm.

This acquisition expands MFS professional survey capabilities while at the same time allowing GEOD to provide its clients with a complete range of engineering including site/civil, geotechnical, structural, aerial mapping & photogrammetry, land surveying, and construction management services from a consolidated source.

WHO

Licensed Professional Land Surveyors
Nationally Certified Photogrammetrists (ASPRS)
Stereo Operators
FAA Certified Remote Pilots
Photo Technicians
Certified Survey Technicians
Field Surveyors
Utility Markouts & Investigation Technicians
Certified ESBE/MBE/SBE

SERVICES

AERIAL MAPPING

Aerial LiDAR Processing
Aerotriangulation (AT)
Stereo Compilation
Low Altitude Mapping & Photogrammetry (LAMP)
Orthophotography
Digital Terrain Models (DTM)
Digital Surface Models (DSM)
Flood Plain Profiles
Base Mapping for GIS Programs
Image Acquisition
UAS/Drone Surveying Services including:
High-Resolution Imagery, Mapping, LiDAR,
Volumetric Studies and Construction Monitoring

SUBSURFACE UTILITY MARKOUTS

DEPTH & LOCATION MARKOUTS OF:
Electric
Fiber Optics
Gas
Rebar
Sewer
Steam
Storm
Tanks
Water

LAND SURVEYING

Boundary Surveys
General Survey Services
Geotechnical & Structural Monitoring
GIS Development
Subsurface Utility Investigation & Markouts
Topographic Surveys
Utility Surveys

3D LASER SCANNING

Exact As-Built Documentation
Volumetrics
Mechanical/Electrical/Plumbing As-Built
3D CAD Models
Point Cloud Data
Elevation Drawings
Plan View Drawings
BIM Integration

FOR

The majority of GEOD's
projects are awarded
based on qualifications
and exemplary past
performance.

Our clients include:

Contractors
Consulting Engineers
Architects
Highway Authorities
Federal Agencies
State Agencies
Municipal Agencies
